What is a hip spica?

A hip spica can be described as 'plaster cast trousers'. Hip spicas are made from 'plaster of Paris' and/or resin (a synthetic material), with a soft lining underneath. There are lots of different types of hip spica but generally they start from above your child's stomach and stop just before their ankles. The exact length of your child's hip spica and the position of their legs will depend on your child's condition and surgical needs.

Designed with your child in mind

Our range of Hip Spica chairs have been specifically designed for children who are in plaster casts following hip surgery and require supportive seating.

We manufacture 3 products in the Hip Spica range: Portable Hip Spica chair, Multi-Adjustable Hip Spica chair and STEPS Hip Spica chair. We are now able to offer you the Portable Hip Spica chair through our rental scheme.

Portable Hip Spica chair

The new design offers high levels of adjustability and is a lightweight solution. The chair takes up little space and can easily be transported in a car, as it can be dismantled. Suitable for children aged 8 months to 3 years old. It is supplied with a 5-point harness and quick release tray as standard.

Quick release tray

The Quick release tray has been designed with the carer in mind. The tray is easy to attach and easy to remove. These two actions can all be accomplished by just using one hand, leaving your other hand free. It is also child proof, which means your child cannot release the tray.

For more details contact us today either by calling on 01626 835552 or emailing at info@smirthwaite.co.uk.

Providing your child with comfort and support when it matters the most!

A new rental option

We understand that you may not need the Portable Hip Spica chair for more than 13 weeks, so we have developed a rental scheme with this in mind. You can rent the chair for a minimum of 3 months.
